

**S07ZL701A**
**S07ZL702A**

Meet the ZL-700 series from TRALERT®, two fully certified LED beacons. Thanks to ECE-R65 class 1 and ECE-R10 certification, these beacons are very suitable to be carried on modern trucks and earth-moving machines, among others. The beacons feature 12 LEDs that collectively provide 13 unique patterns. You can choose between flashing and rotating patterns.

The LED beacon comes standard with a fixed 3-bolt mounting, but is also optionally available with a Flexi-DIN, DIN or single-bolt mounting. The items shown in this leaflet are the S07ZL701A and S07ZL702A, which differ in length. the S07ZL701A (left) is 112mm high and the S07ZL702A (right) is 138mm high.

**Certificates & warranty:**

**Included as standard:**

- connection cable with open end
- Manual & wiring diagram
- Assembly supplies

**Best to use as:**

- Roof-mounted LED beacon
